1996 Publications, by Category and Page Number

The index appears in three parts. The first, which begins below, lists publications by major category, and within categories, by page number. In order, the categories are Original Articles, Concise Communications, Special CIPI Issue, Editorials, SHEA Position Papers, Special Reports, Readers' Forum, the Sections, Letters to the Editor, Abstracts, Book Reviews, Reviews, and Corrections. Items published in Medical News and SHEA News are not indexed.

This comprehensive list is followed by the Author Index (page 836) and the Subject Index (page 840). Each entry in those latter indices points to a major category and page number in the comprehensive list below, where the complete citation may be found.—Ed.

ORIGINAL ARTICLES

Marshall JW, Vincent JH, Kuehn TH, Brosseau LM. Studies of ventilation efficiency in a protective isolation room by the use of a scale model. 17(1):5-10.

Stead WW, Yeung C, Hartnett C. Probable role of ultraviolet irradiation in preventing transmission of tuberculosis: a case study. 17(1):11-13.

Long MN, Wickstrom G, Grimes A, Benton CF, Belcher B, Stamm AM. Prospective, randomized study of ventilator-associated pneumonia in patients with one versus three ventilator circuit changes per week. 17(1):14-19.
